

DSHS will no longer provide a daily update of COVID-19 cases to counties. Instead, they will begin providing a weekly count update.

The COVID-19 case count for November 30, 2020 is as follows:

Confirmed Positive Cases: 50

Active Cases: 7

Recovered Cases: 41

Deaths: 2

The above numbers reflect those who have tested positive and have laboratory confirmed results from a molecular PCR COVID-19 test. These are provided to Delta County and the Delta County Local Health Authority from DSHS. These have not reflected those who may have a positive antigen test result.

DSHS has now began releasing "probable" cases, both active and recovered, that reflect those positive results from an antigen COVID-19 test that was not laboratory confirmed. Those numbers are below and would be in addition to the numbers listed as confirmed.

Probable Positive Cases: 39

Probable Active Cases: 6

Probable Recovered Cases: 33
